## Experience

---

### The WebPlant

December 2025 – April-2026

FullStack intern

Delhi

- Developed and optimized responsive web applications using HTML, CSS, JavaScript, and HubSpot CMS across **20+ client projects**, ensuring consistent cross-device performance
- Built reusable and modular components, improving development speed and consistency across multiple projects
- Integrated **dynamic content** from CMS with frontend interfaces to support scalable and flexible web applications .
- Improved responsive design and cross-browser compatibility, enhancing user experience across devices**
- Collaborated with team to implement client requirements, ensuring clean code, performance optimization, and timely delivery .

## Projects

---

ReplyAI | [GitHub](#) | [View](#) | *Next.js, OpenAI API, PostgreSQL, Tailwind CSS*

April 2026

- Built a full-stack AI chatbot platform that provides **real-time automated customer support** using OpenAI API .
- Developed a dashboard interface to manage chatbot behavior, conversations, and team access .
- Implemented authentication and multi-user system for secure access and team collaboration .
- Created a knowledge base system that processes **websites, PDFs, and text data** for contextual AI responses .
- Enabled chatbot integration on external websites using a script-based embedding system .

AI Finance Platform | [GitHub](#) | [View](#) | *Next.js, Prisma, PostgreSQL, OpenAI API*

March 2026

- Developed a full-stack financial application to track expenses, budgets, and transactions .
- Integrated OpenAI API to generate **personalized financial insights and recommendations**
- Built backend system for secure data storage using PostgreSQL and Prisma ORM .
- Implemented email notifications and background job processing for better user engagement .

NovaTalk — AI Conversational Assistant | [GitHub](#) | [View](#) | *React.js, OPEN API*

November 2025

- Built a real-time AI chatbot interface for interactive conversations using OPEN API .
- Developed dynamic chat UI with formatted response rendering using Markdown .
- Managed API calls and state handling for smooth and fast user interactions .
- Optimized frontend performance for responsive and lag-free experience .

Food Ordering System | [GitHub](#) | [View](#) | *React.js, Firebase*

October 2025

- Developed a responsive food ordering web application with authentication and routing .
- Integrated Firebase for **real-time database management and user authentication**
- Built dynamic UI components for menu display and order processing
- Implemented smooth navigation and state management for better user experience

## Education

---

University of Petroleum and Energy studies (CGPA: 6/10)

2021 – 2024

Bachelor of Computer Applications.

Bidholi, Dehradun

## Trainings

---

Coding Ninjas

Feb 2023 – Feb 2024

Full Stack Web Development

- [Generative AI](#) | [Frontend](#) | [Python](#) | [React Development](#)
